WORK EXPERIENCE

Software Design Engineer - 1

Feb 2025 - Present

Newgen Software

- Developed a reusable Custom Service Framework adopted across 50+ workflows, simplifying service registration, standardizing logging, and improving maintainability across the platform.
- Engineered the end-to-end Copy Workitem feature in Java, supporting both API-driven and trigger-based execution, handling complex business rules across multiple workitem types, and enabling seamless replication of data and associated documents across SQL, Oracle, and PostgreSQL databases.
- Optimized and enhanced core Java APIs to support new client requirements, improving API reliability and enabling scalable feature enhancements.
- Resolved critical production incidents and customer escalations, achieving over 90% SLA compliance while maintaining application stability and ensuring timely delivery of fixes.

System Engineer

Nov 2024 - Jan 2025

Corporate Intellect Solutions

- Integrated Bitrix24 with Busy API to enhance workflow automation, and synchronize data for seamless business operations.
- Automated POCs to demonstrate CRM functionalities to clients, including building a Real Estate Commission Calculator POC, HR Workflows etc. enabling clients to efficiently.

Software Engineer Trainee

Jan 2024 - June 2024

Duck Creek Technologies

- Developed a Java-based framework for enhanced log retention and visibility which standardized logs and centralized them over Splunk Cloud using Azure Event Hub.
- Refactored the framework from synchronous streaming of logs to asynchronous resulting the log streaming in one-fifth time.
- Created tailored alerts and notifications, resulting in reduced incident response time
- Performed end to end Testing of the framework

SKILLS

- | | | |
|------------------------------|--------------------------------|------------------------------|
| • Java, C++ | • Git, Github | • REST APIs |
| • SQL, Oracle, PostgreSQL | • Data Structures & Algorithms | • Splunk Cloud |
| • Spring Boot, Microservices | • System Design | • Monitoring & Observability |

PROJECTS

Live Code Editor

Developed a real-time collaborative code editor using Monaco Editor and Yjs (CRDT) with WebSocket-based synchronization, enabling conflict-free concurrent editing. Containerized the application using Docker and deployed it on AWS ECS for scalable cloud hosting.

CERTIFICATIONS

Splunk Cloud certification, Azure Fundamentals, IBM Certifications on Basics of ML, Spring Boot

EDUCATION

Bachelors in Technology (IT) | CGPA - 9.52

Chitkara University, Punjab | 2020-2024
